TOP	Medium with strong foliage
TOP HEIGHT	8 – 15 cm
TOP COLOUR	Medium green
DISEASE REACTION (SCIENTIFIC)	-
FIELD HOLDING	Excellent
YIELD POTENTIAL	Excellent
SUGGESTED POPULATION	10 – 12 kg per ha, 1.2 - 1.8 million seeds per ha
MARKET USE	Bunching, salad packs and pre-pack
SPECIAL FEATURES	High quality roots with exceptional uniformity, long field holding ability. Delightful colour range and slow to pith

\* Characteristics given are affected by production methods such as soil type, nutrition, planting population, planting date and climatic conditions. Please read disclaimer.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Sakata Seed Southern Africa (Pty) Ltd Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).
