

# Tabaluga

F1 Hybrid Chinese Cabbage

## OUTSTANDING QUALITIES

- ◆ **WIDELY ADAPTED**
- ◆ **EARLY MATURING**
- ◆ **EXCELLENT YIELD POTENTIAL**
- ◆ **DARK GREEN EXTERNAL COLOUR**

**Tabaluga** is a medium maturing Chinese cabbage specifically for the warmer time of year. Heads have a barrel shape with a good yellow interior colour that matures within 60 - 70 days after seedling transplant. Heads weigh between 0.8 and 2 kg depending on the plant population. **Tabaluga** is very adaptable and performs very well in all areas of South Africa. Exterior colour is a dark green colour and leaves are glossy and very fine. Holding ability is good.

## SPECIAL VARIETAL REQUIREMENTS

- Bolting may occur when transplanting end of winter to early spring
- Contact area representative for more information

CHARACTERISTIC*	TABALUGA
TYPE	F1 hybrid Chinese cabbage ( <i>Brassica pekinensis</i> (Lour.) Rupr.)
MATURITY	Medium maturity (60 – 70 days from transplant)
SEASON	All year round in temperate regions and in other regions we suggest only spring and autumn
HEAD SIZE	Large
HEAD SHAPE	Barrel
HEAD WEIGHT	Approximately 0.8 - 2 kg (could be bigger depending on spacing)
HEAD COVER	Good
EXTERIOR COLOUR	Dark green
INTERIOR COLOUR	Yellow
FLAVOUR	Excellent
PLANT SIZE	Medium
PLANT HABIT	Erect
LEAF TEXTURE	Moderately thick and soft
BOLTING REACTION (SCIENTIFIC)	Slow to bolt
DISEASE REACTION	-
FIELD HOLDING	Fair to good
YIELD POTENTIAL	Very good
SUGGESTED SPACING	35 000 - 55 000 plants per ha
USE	Fresh market, novelty and home garden
SPECIAL FEATURES	Widely adapted, slow bolting and early maturing

\* Characteristics given are affected by production methods such as soil type, nutrition, planting population, planting date and climatic conditions. Please read disclaimer.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Sakata Seed Southern Africa (Pty) Ltd Conditions of Sale before ordering seed.

**Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).

\* **Experimental:** This variety does not appear on the current South African Variety list, but has been submitted for registration.

**Recent version:** Kindly contact Sakata or Area Representative for the most recent version of this Technical Bulletin.
