

## OUTSTANDING QUALITIES

- ◆ COOL SEASON
- ◆ RESISTS PITHING
- ◆ TOLERATE WET CONDITIONS
- ◆ STRONG ATTACHMENT FOR BUNCHING
- ◆ DARK RED

**Winner** is a dark red F1 hybrid radish that performs very well in cooler and wet conditions. Maturity is medium, around 26 - 30 days from sowing. Roots are round-shaped, uniform and have a silky smooth shoulder and a refined tap root. Roots have a dark red skin colour. Yield potential is good with high quality and uniform roots. Field holding is good and **Winner** tolerates pithing very well. Foliage is medium to tall, healthy and dark green. Very strong attachments make it suitable for bunching. **Winner** is used for quality bunching, salad packs and the pre-pack markets.

## SPECIAL VARIETAL REQUIREMENTS

- Suitable for all year round production
- Contact area representative for a sowing guide

CHARACTERISTIC*	WINNER
TYPE	F1 hybrid red radish ( <i>Raphanus sativus L. var. sativus L.</i> )
MATURITY	Medium (around 26 - 30 days from sowing)
SEASON	Cooler wet conditions
ROOT SHAPE	Round
DIMENSIONS	2.5 x 2.5 cm
SKIN COLOUR	Dark red
SMOOTHNESS	Very smooth
FLESH COLOUR	White
FLESH TEXTURE	Very firm, crisp
PITH RESISTANCE	Very good
CRACK RESISTANCE	Very good
FLAVOUR	Mild
TOP	Medium to tall with a strong attachment
TOP HEIGHT	10 - 18 cm
TOP COLOUR	Dark green
DISEASE REACTION (SCIENTIFIC)	-
FIELD HOLDING	Very good
YIELD POTENTIAL	Very good
SUGGESTED POPULATION	10 - 12 kg per ha, 1.2 - 1.8 million seeds per ha
MARKET USE	Bunching, salad packs and pre-pack
SPECIAL FEATURES	High quality roots, slow to pith and strong attachments for bunching

\* Characteristics given are affected by production methods such as soil type, nutrition, planting population, planting date and climatic conditions. Please read disclaimer.

**Disclaimer:** This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Sakata Seed Southern Africa (Pty) Ltd Conditions of Sale before ordering seed. **Resistance:** is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).

\* Experimental: This variety does not appear on the current South African Variety list, but has been submitted for registration.
